

Photo Opportunities

Mom, brush your hair- you will appreciate this later. Try and take the most flattering pictures of your baby. Try not to focus on scarring- it will make you cry more later. Put baby at angles where mouth is somewhat closed if possible. These shots make it look more like baby is sleeping. Take photos in the brightest light and stay a couple feet back so you are in focus.

- Close up picture if hair or lack thereof
- Close up of hands
- Close up of feet
- Close up of mommy and daddy holding baby's hands/feet
- Baby with Mommy
